PAYROLL CHECK

5 signs your payroll has outgrown Excel.

If three or more sound familiar, it's time for a system.

01

PAYROLL · 5 SIGNS

Only one person understands the file.

When they are on leave, payroll waits. Formulas nobody else can read are a risk, not a system.

THE FIX

Clear payroll rules that anyone with access can run and check.

02

PAYROLL · 5 SIGNS

Overtime is added by hand every month.

Copying hours from timesheets into a spreadsheet takes days and invites mistakes.

THE FIX

Check-ins and timesheets flow straight into payroll.

03

PAYROLL · 5 SIGNS

Leave balances are argued about.

Staff ask, HR searches, managers guess. Nobody trusts the number.

THE FIX

Live leave balances every employee can see on their phone.

04

PAYROLL · 5 SIGNS

Nobody knows the end-of-service liability today.

Gratuity is worked out only when someone leaves, often under pressure.

THE FIX

End-of-service and ticket accruals calculated every month.

05

PAYROLL · 5 SIGNS

The WPS file is rebuilt every month.

Reformatting bank files by hand delays salaries and causes rejections.

THE FIX

WPS file ready in one click, after a PIN approval.

TRY IT YOURSELF

See payroll done in minutes.

Pick your type of business and the live demo builds itself with sample data. No sign-up.
